

AKSHAT BALOTHIYA

AI / MACHINE LEARNING ENGINEER - PYTHON DEVELOPER - B.TECH ENGINEERING STUDENT

akhatbalothiya@gmail.com | 7987015566 | linkedin.com/in/akshat-balothiya-a552aa360 | CGPA: 7.0

PROFESSIONAL SUMMARY

Results-driven B.Tech Engineering student specializing in AI, Machine Learning, and Python-based software development. Proven ability to design and ship AI-powered applications, translating machine learning fundamentals into working, real-world products. Hackathon and ideathon winner rapidly prototyping innovative tech solutions.

TECHNICAL SKILLS

AI / ML / DL: Machine Learning, Deep Learning, Generative AI, Groq / LLaMA-3.3, Whisper, Graph Anomaly Detection

Programming Languages: Python, Java, C, JavaScript, TypeScript

Web & App Development: React Native, HTML, CSS, REST APIs

Data & Databases: SQL, Data Structures & Algorithms, Problem Solving, Git, GitHub, TMDB API

PROJECTS

CryptoTrace | Python, LLM (Groq LLaMA-3.3), Speech Recognition (Whisper), Graph-Based ML

- Engineered an AI-powered blockchain fraud-analytics platform for Smart India Hackathon 2026.
- Integrated Groq LLaMA-3.3-70B LLM to generate explainable plain-language fraud-risk reasoning.
- Built multilingual speech-to-data pipeline using Groq Whisper converting voice complaints under 2 mins.
- Designed graph-based anomaly-detection heuristics cutting manual investigation from 2-3 weeks to under 10 mins.

Rural Hart | Web Platform, Full-Stack Development

- Built a digital platform connecting rural artisans directly with customers to expand market access.
- Focused on an intuitive, accessible user experience to bridge the digital divide for non-technical users.

BingeBolt | React Native, TMDB API

- Developed cross-platform movie discovery mobile app in React Native integrated with TMDB API.
- Implemented clean, responsive UI/UX to deliver a smooth browsing and discovery experience.

ACHIEVEMENTS

- Winner - College Hackathon: recognized for building innovative tech solution under time constraints.
- Winner - College Ideathon: awarded for original problem-solving and technology-driven idea development.
- Delivered multiple real-world software projects spanning AI, web, and mobile development.

CERTIFICATIONS

- Java & Data Structures and Algorithms - Sheryians Coding School (Mar 2025 - Oct 2025)
- Machine Learning Fundamentals | Artificial Intelligence Fundamentals | Python Programming
